

POLY SOLUTIONS GUIDE TO WORKING FROM ANYWHERE

NO MATTER WHERE OR HOW WORK HAPPENS, GIVE YOUR PEOPLE THE TOOLS THAT ARE MADE TO WORK.

Work doesn't happen the way it used to. It's no longer a single place to go or a time of day. It's a wherever, whenever reality that continues to evolve. But some things haven't changed. Work still means getting stuff done. It still depends on clear communication and collaboration. On technology that promotes connections, while tuning out distractions. On devices that set up your workforce for success. And on [easy device management](#) that means less work for you.

Smart conference phone that delivers native experiences on any collaboration platform

- Start meetings on time with one-touch join
- Expansion microphones deliver brilliant Poly audio for even large conference rooms
- Complements any other Poly video solutions with fast, simple control

[LEARN MORE](#)

POLY EAGLEEYE DIRECTOR II

High-performance HD video camera that follows the action and shows every detail

- Take conferencing to the next level with people-tracking and automatic zoom
- Meeting-goers can focus on business, not on staying in frame or working a remote
- Powerful analytics and insights help maximize your investment in each room

[LEARN MORE](#)

ON-THE-GO

**WHEN WORKING ON THE GO,
PEOPLE NEED TOOLS FOR TO KEEP
THE CONVERSATION GOING WHEN
THEY REACH THEIR DESTINATION**

TYPICAL ENVIRONMENT

- Frequent participation in calls while in transit between home and office (cars, trains, taxis or even on foot)
- May host conference calls with multiple people in the same location
- Noise is coming from everywhere—from fellow travelers to weather conditions

COMMUNICATION NEEDS

- Compact devices that are easy to carry and use
- Long battery life to match long commutes
- Ability to hear and be heard clearly in noisy environments
- Seamless technology integration with laptop and mobile phone

POLY VOYAGER 5200 UC

Pocket-sized Bluetooth mono headset for workers on the go

- Sound professional in any environment, whether connected to a PC or mobile phone
- WindSmart technology and four omni-directional microphones to reduce distracting background noise
- All-day comfort in a very discreet package

[LEARN MORE](#)

POLY SYNC 20

Personal USB/Bluetooth smart speakerphone for premium sound and portability

- Remarkable sound with up to 20 hours of battery life for immersive music, multimedia, or meetings
- Reduces echo and noise so meeting-goers can hear the speaker clearly
- Slim and portable—so deployment is simple and it can be used anywhere work takes place

PROVISIONING AND MANAGING DEVICES FOR YOUR HYBRID WORKFORCE JUST GOT A LOT LESS COMPLICATED

Hybrid working offers employees a whole new level of flexibility—something that many members of the workforce have been seeking for years.

Making sure your workforce has the right equipment to communicate and collaborate will give them the flexibility to work where they want with consistent call quality.

One of the new challenges businesses have been facing is managing devices across a hybrid estate where a large number of remote workers and might not even be using professional headsets—or headsets at all. Now there's an opportunity to help them look and sound their best, no matter where they work.

Poly has the perfect device management solutions to deploy, manage, monitor and troubleshoot your entire suite of collaborative devices.

POLY LENS

Cloud-based insights and management for the entire UC device investment in video, voice, and headsets

- Highlight the most important and meaningful actions and insights with a simple dashboard layout of intelligent news
- Onboard one or thousands of compatible devices with centralized provisioning without complex setup or technical support
- Free IT staff to focus on important issues by releasing them from mundane tasks like one-by-one software updates or single device setting configurations
- Streamline operating costs by making more informed unified collaboration investment decisions about device adoption
- Amplify your business budget with zero capital expense for buying, powering and maintaining servers for your device management
- Provide your end users with an all-in-one app that allows them to adjust personal settings, keep their software up to date, get support, and improve their workday

[LEARN MORE](#)

CLARITI

All-in-one meeting platform deployed in a private cloud

- Get call signaling, firewall traversal, multi-point, management software for desktop and mobile users in a single solution
- Ensure devices are up to date and running at peak performance with centralized device management

[LEARN MORE](#)

REALCONNECT

Microsoft video interoperability - simplified

- Connect traditional video conferencing systems to Microsoft Teams or Skype for Business with cloud-based services

- Premium insights and management for enterprise IT administrators
- Exclusive Professional Services discounts

SUPPORT SERVICES

On-demand expertise

- Our customer support services meet your specific requirements from hardware replacement or telephone support only through to proactive, personalized support, enabling you to select the level of support contract that is right for your organization
- Troubleshooting to resolve and advance hardware replacement services
- Ecosystem cloud partner endpoint support model provides you one organization to contact for your queries (available with Elite, Poly+ and Advantage)
- In-depth expertise helps reduce risk, increase uptime, and drive productivity and adoption

PROFESSIONAL SERVICES

Our expertise. Your aspirations.

- End-to-end services and guidance for all phases of technology adoption, from planning to design, deployment and optimization
- On-site and remote services to reduce risk, tailor solutions, conserve resources, speed deployment, accelerate adoption, and more
- Unique services specifically for Microsoft Teams or Zoom environments

MANAGED SERVICES

Run smarter. Run better.

- Our offerings allow you to outsource day to day technology management responsibilities to our team of experts
- Expert help in managing your collaboration solutions to reduce the burden on internal IT and keep collaboration solutions reliable and cost-effective
- Our experts and partners can ensure optimal operation, provide ongoing remote monitoring and hosting services to help you meet changing requirements while saving on operational expenses

IF YOUR COMPANY'S WORK-FROM-ANYWHERE NEEDS ARE DIFFERENT FROM THE SCENARIOS WE'VE OUTLINED IN THIS GUIDE, USE THESE QUESTIONS TO HELP CHOOSE THE RIGHT POLY SOLUTIONS TO MEET YOUR SPECIFIC SITUATION.

WHAT IS THE MOST PRODUCTIVE WAY TO COMMUNICATE WITH EMPLOYEES, COWORKERS, PARTNERS AND CUSTOMERS WHILE WORKING REMOTELY?

Your organization needs to determine what modes of communication it wants its employees to use. Audio calls may suffice for quick chats and answering urgent requests, but we recommend using video wherever possible to ensure more meaningful conversations. This is especially critical when employees are working remotely without the benefit of in-person interaction.

WHAT EQUIPMENT WILL EMPLOYEES BE USING TO WORK REMOTELY?

The typical devices people use to work remotely are a laptop or desktop PC, a tablet and/or a mobile phone. Knowing which of these computing devices employees are using, and if they will be switching between them, will influence the choice of headsets, speakerphone and video cameras. In our experience, remote workers end up using all of these devices to stay engaged, so we recommend devices with the ability to easily switch between a laptop, tablet and mobile phone.

DO EMPLOYEES NEED THE FREEDOM TO MOVE FROM THEIR WORKSPACE DURING CALLS OR WILL THEY BE STATIONARY?

There are two main ways to connect communications devices to computing devices: wired (sometimes called corded) and cordless. Wired solutions are less expensive than their cordless counterparts and you don't have to worry about how long the battery will last. But they do limit the ability to move around and remain on a call. Wireless connections give more freedom to roam and can switch from one computing device to another without having to plug or unplug anything. Wireless devices run on batteries and will have to be recharged regularly. We recommend the connection type that will meet the needs of different workstyles and budgets.

IF YOUR COMPANY'S WORK-FROM-ANYWHERE NEEDS ARE DIFFERENT FROM THE SCENARIOS WE'VE OUTLINED IN THIS GUIDE, USE THESE QUESTIONS TO HELP CHOOSE THE RIGHT POLY SOLUTIONS TO MEET YOUR SPECIFIC SITUATION.

How can employees minimize distractions from noises around them and prevent people on their calls from hearing them?

Noise in and around remote working locations can be distracting, causing decreased focus at work. Poly headsets, speakerphones and video bars use noise cancelling microphone technology to protect everyone on the call from hearing background noise. To help employees concentrate, Poly headsets use both passive isolation and active noise cancelling technology to block the distracting sounds around workers so they can keep their attention on the task at hand.

Which style of headset is best?

Headsets come in a variety of wearing styles to accommodate different worker needs and preferences. Options include over the top of the head, behind the neck, on the ear and in the ear. Some styles cover one ear and some both. Poly has the broadest portfolio of ANC headsets to choose from. For those that don't want to wear a headset Poly has a line of personal speakerphones and video bars that deliver clear audio communications without having to wear anything.

Are special cameras needed for video calls?

Many laptops today come with very simple and basic integrated video cameras. They work, but they don't deliver a high definition picture or the best camera angle for most people. Poly video solutions include HD cameras and range from a simple USB camera (Poly Studio P5) to more sophisticated solutions such as the Poly Studio P15 that includes integrated microphones, speakers and a camera with advanced noise blocking and video production capabilities. These pro-grade capabilities make a huge difference in how your employees will be seen and heard when they are working from anywhere.
