# Alma Works for E-Resource Management

Increase Library Impact with Alma Starter

As libraries continue to witness the continued growth of electronic resources there is greater pressure to better manage them and operate more efficiently, while also satisfying patron and institutional needs.

Leverage the Alma Starter unified suite of ERM functionality and benefit from centralized management of e-resources, streamlined workflows, insightful analytics, a built-in link resolver, and more.

Unlock your library's potential with Alma Starter

Increase Library Efficiency

Surpass Patron Expectations

Exceed Institutional Goals

How Alma Starter Helps You

- Benefit from end-to-end workflows, from selection to activation

- Receive daily collection updates via fully integrated knowledge base

- Leverage the extensive e-resource knowledge base - no more creating from scratch

- Gain workflow efficiencies through automation – such as e-holding updates, renewal reminders, WoS JCR Incites integration, and more

- Support informed decision-making with collection analysis, cost-per-use, and analytics tools

- Centralize management of licenses, including upcoming administration of Open Access and transformative agreements

- Provide seamless resource access for discovery with built-in link resolver

- Ensure data security, redundancy, and privacy

Alma Starter is an easy-to-use e-resource management solution
