

# ProQuest Dissertations & Theses (PQDT) Global + Web of Science

Comprehensive view. Diverse perspectives. Streamlined research.

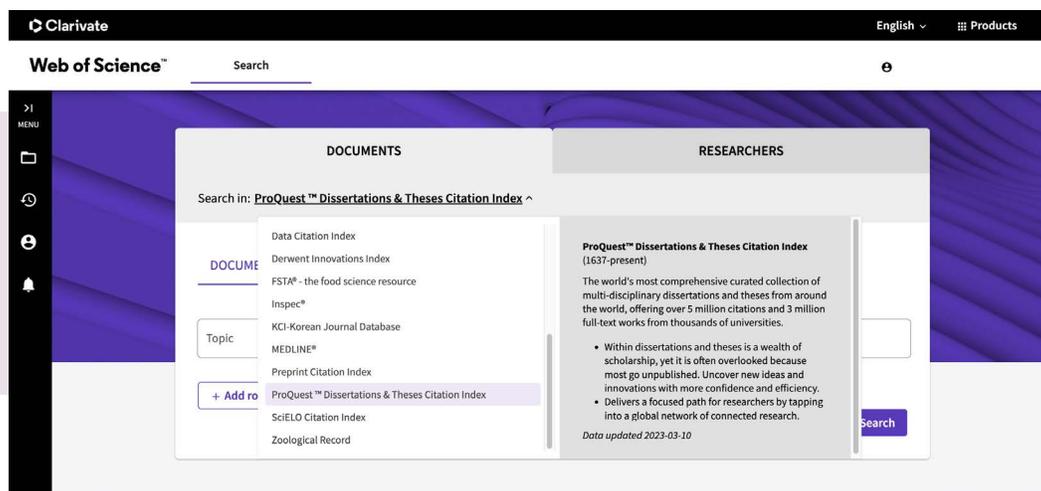

## Introducing ProQuest™ Dissertations & Theses Citation Index on Web of Science

In a recent survey of Web of Science™ customers, the majority of respondents agreed that:

- **Dissertations and theses are an essential part** of understanding the research landscape
- **Dissertations and theses add value** to Web of Science by providing users simultaneous access to unpublished and published multidisciplinary scholarship
- **Academic researchers value the ability** to find more detail on the published research from the original dissertation

## In response, Clarivate has integrated ProQuest Dissertations & Theses metadata and abstracts with Web of Science

This new solution offers a more comprehensive literature review with access to abstracts of early career research alongside journals, preprints and other scholarly sources. The powerful combination of premium, curated metadata from PQDT Global with the robust discovery network and analytics capabilities of Web of Science enables users to obtain relevant results from multiple sources in one platform environment, eliminating the need to search multiple databases.

## Help researchers capture more early career research alongside other scholarly outputs in a single search

- **Uncover** more than 5.5 million dissertations and theses from over 4,100 institutions from more than 60 countries.
- **Identify** emerging areas of research and the graduate programs that are engaged in this research.
- **Execute** more comprehensive literature reviews by including unpublished scholarship and diverse perspectives.
- **Showcase** their achievements to peers and evaluators by claiming their dissertation or thesis in their Web of Science Researcher Profile.
- **Now Available!** Cited reference indexing and linking further connect dissertations and theses to the Web of Science network. In addition to building a more holistic view of a research topic by including unpublished scholarship and diverse perspectives, with **>172 million cited references from dissertations and theses** researchers can now:
  - Follow citation links to spark new ways of thinking about an idea.
  - Quickly explore the research foundation of dissertations and theses on novel and niche topics and locate research that shares part of that foundation.

# Streamline research in the Web of Science with PQDT Global full text

PQDT Global is a comprehensive, curated collection of multidisciplinary dissertations and theses from around the world, offering over 5.5 million citations – a wealth of quality scholarship not discoverable in other scholarly sources.

Combine this full-text resource with peer-reviewed literature to ensure students and researchers have access to the most comprehensive view of available evidence and emerging research from post-graduate programs worldwide.

## PQDT Global delivers 3.2 million full-text works providing:

- **Global research** from 4,100 universities in more than 60 countries
- **Diverse scholarship** covering historical and emerging trends and niche topics
- **Detailed methodologies** and research outcomes, often not published elsewhere

The screenshot displays the ProQuest Web of Science interface. On the left, a search result for a dissertation is shown with a red box around the 'View Full Text on ProQuest' link. The main content area shows the full text of the dissertation: 'Distribution, ontogenetic profile, and anti-predator efficacy of tetrodotoxin in two species of blue-ringed octopuses (Haplochaena lunulata and H. fasciata)' by Becky Lynn Williams. The interface includes a sidebar with metadata, a central text area with a 'Read About' button, and a 'Similar Dissertations' section at the bottom. A 'Foundational Research on this topic' sidebar is also visible on the right.

**Direct linking from Web of Science to the full text records in PQDT Global on the ProQuest Platform is available for mutual subscribers.**
