Sage 200cloud 2020 R2 - What's New
Professional Variant

Sage 200cloud is part of a global franchise which has a single vision and strategy across fourteen countries worldwide. Our go forward strategy is evolving, and our focus will be on the following three key elements, allowing us to deliver the right solution for our customers.

1. Web enabling Sage 200 client with a choice of data deployment (on-premise or on Microsoft Azure), delivering the following key elements:
   - Browser based client data entry
   - Microsoft Power Apps, BI & Flow functionality
   - Flexibility to customise to support business requirements
   - Choice of data deployment (Professional variant only)
   - Greater accessibility standards – supporting multiple browser / font sizing and scale / technology choice and power to run from tablets

2. Strengthening core accounting functionality & API development
   - Simplified experience and system flow
   - Focus on key accounting processes
   - Continued API development

3. Vertical specific propositions
   - Delivering the appropriate feature set for our customers, to support their industry requirements

Sage 200cloud 2020 R2 will be released in December 2020, for Sage 200cloud Professional

Sage 200cloud is built on direct customer feedback with customers telling us that simplifying their business processes is key, whilst improving the user experience to become more productive on a daily basis is what really matters to them.

Note: these updates will also be provided to Sage 200 Extra Online.

Highlights include:

- Compliance updates to support the UK transition from the EU.

A detailed list of new features and benefits per module is provided within this guide:

Feature	What	Explanation	Benefits	Location in software
