Sage 100cloud
Intelligence Reporting

Improve visibility throughout your business to make faster, more informed business decisions.

Save time. Take control.
Take action.

""From an accounting perspective, the reporting capabilities of Sage 100cloud Intelligence Reporting were just what we needed to create the internal and external reports required." – Daniel Stoner, Director of Accounting, Nephron Pharmaceuticals.

Sage 100cloud Intelligence Reporting is a flexible business reporting tool that integrates with your Sage 100cloud solution and allows for better insights into your business's data. Intelligence Reporting gives you a holistic view of your business by seamlessly consolidating your data from Sage 100cloud, reducing spreadsheet chaos, and improving collaboration across your business.

With Intelligence Reporting, you can automatically run and distribute fully customizable reports in Microsoft® Excel®, so you spend more time analyzing the data, and less time locating and preparing it. You have the choice to either customize the ready-to-use reports or create new reports to suit your business's unique requirements, ensuring that visibility of your information is always just a click away.

Sage 100cloud Intelligence Reporting empowers you to:

Use your existing **Microsoft Excel knowledge** to easily create and edit reports, giving you instant visibility across your business.
Spend more time focusing on **analysis and interpretation** of your information and less time pulling the data together.

Design **customized reports** that suit your business's unique requirements.

Key Features and Benefits

1. **Better insights for more informed business decisions.** Analyze trends and monitor your business's performance by getting a holistic view of your business, or drill down into the detail to get greater insights.

2. **A tool you're already familiar with.** Intelligence Reporting delivers reports in Microsoft® Excel®.

3. **Save time with report automation.** No longer will you have to export your data to Excel and report outside of Sage 100cloud. Reports are linked to your data source.

4. **Reports are ready to use.** To run an out-of-the-box report that has already been formatted for you, all you need to do is select the information you want to report on. Additional reports are also available on an ongoing basis, and are easily imported through the Report Utility.

5. **Reports are easy to customize.** Need a specific report? Customize a ready-to-use report or simply create one from scratch with this flexible reporting tool.

6. **Complete control over your finances.** Easily drag and drop the building blocks of your financial layouts within the familiar interface of Excel, allowing you to take control of all the design aspects of your financial reporting layouts.

7. **Software that suits your business's needs.** Intelligence Reporting is scalable, meaning that you can add or remove users, companies, and reports to match your business's growing needs. This includes being able to report on multiple fiscal years, multiple budget sets, and multiple budget versions across all available account segments.

8. **Complete control over the level of detail in reports.** Easily filter your information to view your organization in different ways through flexible Reporting Trees and Report Groups.

9. **Automated Report Distribution.** Reports can be scheduled to be automatically distributed at any time to individuals or teams, through various formats and platforms.

Why Intelligence Reporting?
Better decision making, improved effeciency and business growth are the top three reasons business owners use business intelligence.

Key Components

Report Viewer. The Report Viewer allows you to run out the relevant reports. It comes with basic filtering capabilities (filtering and changing of parameters) and drill-down functionality on existing reports.

Report Manager. The Report Manager allows you to author new reports, filter and aggregate data, as well as create new reports with the standard data tables available. This tool also allows you to set permissions and security for reports.

Report Designer. This Excel add-in allows you to easily create and edit financial statements using a graphical "drag and drop" interface, giving you full control of your financial reports.

Connector module. The Connector module allows you to connect to more than one database at a time, enabling you to do multicompany or multicurrency consolidations and create new data containers for specific customized reports on any part of your Sage Business Solution and/or any other data sources.
