

PRODUCT SHEET Sage 300 Construction and Real Estate

Custom Reporting Features

Sage is the market leader in job cost accounting for construction and real estate companies with over 40 years of industry experience. Superior cost management is at the core of Sage 300 Construction and Real Estate. Features like report designer, inquiry designer, SAP® Crystal Reports, and financial statement designer make Sage the right choice for your construction and real estate accounting needs.

Report Designer

Quickly and easily modify one of over 500 predefined reports or create your own. Building reports is as easy as identifying the information to be reported and including it in the report template. Reports can be totaled at any level and conditions can be applied to include only the information you want to see.

Report Designer also gives you the ability to customize the presentation of your report with options such as different fonts, line spacing, page breaks, and date formats. Plus, you can add emphasis with bold, italic, and underlined type. These options and many more offer the flexibility to design reports exactly the way you want to see them. Once designed, reports can be placed on the main tool bar which can be customized by role to provide quick and easy access to the information they frequently need. With Mobile Intelligence, custom reports can be accessed anytime, anywhere from a web browser. Keep everyone aware of relevant information whether they're in the office, in the field, or anywhere in between. This ease of reporting access can drive informed decision making and help maximize project profitability.

Construction companies use Report Designer for:

- Easy access to reports customized to meet your specific needs.
- Powerful customization options that can be easily implemented to report the information you need in the way you prefer to see it.
- Building one of 500+ predefined reports or creating your own from scratch.

"The biggest benefit that we get from Sage 300 is the ability to integrate all aspects of our operation... This gives us tremendous insight across the operation, and with all the data in one integrated solution, it eliminates the need for separate applications and duplicate data entry."

- Linda Allstadt, CFO and Vice President of Finance, F.A. Peinado, LLC

Inquiry Designer

Customize the presentation of your Sage 300 Construction and Real Estate data with Inquiry Designer. Start by modifying one of over 100 standard inquiries, each containing instant access to business and accounting information, or create a new one from scratch.

When designing inquiries you can include data from any part of Sage 300 Construction and Real Estate, and apply any formula, condition, or note you choose to ensure the data most relevant to your needs is presented in the way you prefer to see it.

Construction companies choose Inquiry Designer to:

- Get complete control of inquiries specific to your business needs.
- Create inquiries from over 100 templates or from scratch.
- Discover drill-down capabilities that give quick and easy access to supplemental information.

SAP® Crystal Reports for Sage 300 Construction and Real Estate

SAP Crystal Reports transforms your Sage 300 Construction and Real Estate data into presentation-quality reports. Simple design tools and built-in assistance guide you through common report-building tasks such as connecting to your data source, selecting fields and records, grouping, sorting, and formatting. Templates provide many standard formatting options, letting you easily select colors and fonts, include images, and add other elements such as your company logo. Report templates, including both formatting and data access operations, can be customized, saved, and applied consistently across a variety of reports.

SAP® Crystal Reports offers your organization:

- Presentation-quality reports at the touch of a button.
- Multiple templates available for quick customization.

Financial Statement Designer

Included as a component of the general ledger in Sage 300 Construction and Real Estate, the Financial Statement Designer allows you to quickly and efficiently modify predefined financial statements or create your own custom statements from scratch.

The Financial Statement Designer makes it easy to define the contents of each column, perform calculations on financial data, and print statements for current and prior periods. Construction companies choose to use Financial Statement Designer for:

- Custom financial statements based on your needs.
- Complete control of your financial statement's design.
