

# Real-time vehicle telematics

O<sub>2</sub> Track and Go is an entry-level tracking solution that uses a plug and play device which provides full visibility of your business fleet.

The O<sub>2</sub> Track and Go plug and play device clips easily onto a car's OBD-II port. You can install it yourself and move it between vehicles, and it supplies:

- Real-time vehicle location
- Trip visualisation
- Unlimited geofencing
- Alerts and reports

## One supplier across the UK and Europe

We offer full connectivity across all UK networks and mainland European countries where we have roaming agreements. And that's included within the monthly fixed subscription. Unlike others, we also provide an end-to-end service wrap, covering devices, set-up and in-life support – meaning you don't have to waste time and effort managing multiple suppliers.

## Benefits for leasing and rental companies

You'll be able to pinpoint exactly where each vehicle is – giving you greater scope for balancing vehicle availability against bookings. We will also send you an alert and report if your vehicle has been involved in an accident or has a fault, allowing you to contact the driver to arrange recovery and repair, and so reduce operational costs. Its trip visualisation capability also allows you to control costs by being able to analyse historic trips, while geofencing allows you to analyse the time spent in specific location types – such as home, office, customer site, etc.

## What you get with O<sub>2</sub> Track and Go

- Real-time location data: viewed through a web portal
- End-to-end solution: no more multiple suppliers
- Full UK and European coverage: and if a vehicle travels outside this, the solution will save all data and transmit it when back in coverage
- World-leading technology: including hardware, firmware and software
- Easy installation: install yourself (or through a specialist)
- Easy integration: with any platform to build value-added services
- Best-in-class device: one of the largest OBD-II deployments in North America\*
- Telefónica telematics track record: over 500,000 units installed worldwide\*\*

We'll support you all the way
