The Future Of Video Surveillance in Security - Challenges, Opportunities and Trends

The webinar will focus on the current challenges, threats and opportunities in video surveillance and the security sector. Major trends such as AI, video analytics, facial recognition, integration and the cloud will all be discussed throughout the roundtable session. Answers to a survey sent out from IFSEC earlier in the year, canvassing key vendors and analysts in the sector, alongside research from IFSEC Global, will help formulate the areas of debate. There will also be a free eBook to download for attendees.

Session Format: Panel discussion

Moderator: James Moore, Editor, IFSEC Global

Panellists:

- Ben Linklater, Chairman, Video Surveillance Systems Group, BSIA & Sales Director, Optex
- Alex Carmichael, Chief Executive, SSAIB
- Fraser Sampson, Biometrics & Surveillance Camera Commissioner, Home Office
- Oliver Philippou, Research Manager, Physical Security Technologies, Omdia

ACCO Product Demo

Join ACCO's Tech Talk on June 8th at 10am at Facilities Show Connect 2021. The team is really looking forward to presenting the Kensington UVStand™ - a fantastic product that will really resonate with the needs and challenges of many facilities managers and decision makers as they prepare to reintroduce staff to the office.. Health and safety need to be a top priority for this next phase of business, but for any new initiatives to be successful, there needs to be active participation throughout the organisation. The great thing about this product is that it makes it really simple to effectively sanitise high-touch items with minimal effort.

Digital FM: Accelerate Your Cost Saving, Compliance and Engagement Strategies, with the Latest Facilities Management Technology

Providing a high-quality FM service now increasingly has to include a clear understanding that the recipients of that service are part of a world that demands full transparency and a seamless/fuss free involvement in the execution of the service. This imperceptible interaction with the service recipient is increasingly required to be delivered utilising technology that behaves in a way that is completely familiar and accepted by them, whilst at the same time acknowledging that their core business activity takes precedence and should not be impacted. Therefore design, usability and efficiency are key aspects of modern FM technology, ensuring it presents no deviation or distraction from the myriad of accepted technology that forms part of a normal day.

Elogbooks Product Demo - Elogbooks 4D Smart Building Technology Discussion

4D Monitoring's presentation provides an overview on Smart building technology for property owners & managers. Focusing on how providing owners & property managers with total visibility of operational performance across an estate by retrieving asset data from multiple sites with regular performance reports, you can see improvements over time as well as showcasing savings made. By providing intuitive data, exception reports with inbuilt alarms which do the hard work, site teams are then able to make quick, effective decisions. This improves property performance, governance which in turn helps owner / occupiers demonstrate portfolio sustainability, with a rapid return on investment.

Data Driven Decision Making

FM has become more reliant on data and technology - decisions are now expected to be based on hard data rather than gut feel or experience. Insight from Service Works FM Software Survey show most FMs are integrating their CAFM system with at least one other system to improve data accuracy and streamline services. Technology such as BIM platforms, BMS, health & safety, space management or CAD help create a single version of the truth that FMs can easily access and manage effectively. Integration allows systems to communicate with each other and securely share data, reducing work for the FM team. This panel of industry experts will outline how effective CAFM and data driven decision making can improve building performance and help generate tangible ROI for users.

Benefits of Clean Air in Indoor Working Environments

Sponsored By Zehnder

- Role of ventilation in reducing transmission of COVID-19
- Ventilation versus filtration – differences and when to use which one
- Best practice for businesses bringing workers back into offices
- Non-COVID-related issues with air quality in sectors including manufacturing
- WHO recommendations on levels of airborne particulates
- Highlights from the Global Action Plan/Zehnder whitepaper on air quality

Session Format: Thought leadership panel

Moderator: Ian Hart, Editor, SHP

Panellists:

- Ben Simons, Head of Europe West, Zehnder
- Keith Cotton, Global Action Plan

Cognyte Product Demo - Big Data Yields Big Results

Intelligent security systems, sensors and alarms form the backbone for ensuring city safety. Data from connected security systems, devices, social media, and operating systems can help ensure safety and optimize operations. But the amount of data collected today can be overwhelming. Cities need to turn raw data into insight to make quick, well-informed decisions. With Cognyte's Symphia portfolio of security solutions, enterprises and governments can connect virtually any system or device for greater command and control. Join us to learn how Symphia fuses data from various sources, analyzes it at scale, and delivers real-time insight to protect what matters most.

Advancis Product Demo

Simplify event processing in the control centre: Learn how events reported by a wide variety of technical systems are handled easily and safely using the open PSIM platform WinGuard from Advancis. WinGuard enables the unified control of systems such as fire/intrusion alarm, CCTV, access control, BMS, etc. Dynamic workflows support the operator in event processing. The platform is available with over 470 interface drivers, new ones constantly being released and open for 3rd party developments. Join Richard McClellan, Sales Director UK & Ireland, and Allan Dickinson, Technical Manager UK & Ireland at Advancis for a demo and to answer your individual questions.

Protecting Cities and Public Spaces - Connecting the Assets

The webinar will focus on the crucial topic in security that is public safety in our cities. In a world with ever-increasing threat levels, and as cities continue to expand into more digitised environments, it is vital we protect citizens and organisations from physical and cyber threats. A key theme of the discussion will include how an integrated approach can support in the development of large, secure urban areas, and how this may progress over the coming years. And, how will technology and physical security procedures converge to combat emerging threats.

Session Format: Presentations into panel discussion

Moderator: James Moore, Editor, IFSEC Global

Panellists:

- Sarb Sembhi, Co-Chair of Smart Building Environment Group, IoTSE and CISO & CTO, Virtually Informed
- James Willison, Co-chair of Smart Building Environment Group IoTSE, and Founder, Unified Security Ltd
- Stuart Williams, Representing the Security Institute and Founder, Blackford Security Consultants
- Mark Weatherley, Senior Sales Director, Avigilon at Motorola Solutions

AICO Product Demo - The Ei1000G SmartLINK Gateway - The Smarter way to Check Every Tenant's Safety at any Time

Aico's ground-breaking Ei1000G SmartLINK Gateway is an innovative solution for landlords, providing access to real-time data insight into the status of the Smoke, Heat and Carbon Monoxide alarm systems across their entire housing stock. Using its built-in GSM data connection, the Ei1000G utilises Aico's next generation of wireless technology to report events including Fire/Carbon Monoxide activations and alarm head removals as they happen to the SmartLINK cloud portal, for full visibility and remote monitoring.

Securiton Product Demo – Fire Detection Technology from Securiton Switzerland

Securiton AG belongs to the Swiss Securitas Group and has been entirely at the service of technical security since its founding in 1948. Securiton develops and manufactures a large range of different fire detection systems to fulfill broad customers' needs from commercial buildings, industries, telecommunication, utility stations, tunnels and others. For the detection of smoke, heat or flames, a variety of detection technologies has been developed to ensure efficient alarm release in dangerous situations. Combined with the most advanced fire alarm system software, the functionality of Securiton fire alarm systems know no limits when challenged by customer requirements.

Evacuation of Tall Buildings - Guidance, Procedures and Standards

The webinar will focus on the current guidance on the evacuation of tall buildings, including an assessment of BS 8629:2019 and what fire safety professionals and building managers/owners should know. Discussion will revolve around the devices related to evacuation, such as panels and alarms, the FRS' current standing on the stay put policy, temporary alarm installations to replace Waking Watch patrols, and other related issues.

Session Format: Short presentations and then into panel discussion

Moderator: Gerry Dunphy, Strategy Director, IFSEC & FIREX International

Panellists:

- Russ Timpson, Managing Director, Crisisboardroom & Tall Buildings Fire Safety Network
- Richard Clark, Senior Fire Engineer, National Fire Chiefs Council
- Andy Scott, Chair of BSI FSH/12/5 fire alarm devices and Director, C-TEC

Polyseam Product Demo

We are committed to creating safer environments for all, this not only includes creating products that protect against fire but are also eco-friendly and non-toxic. In 2020, our parent company, Polyseam, designed our new Eco-Foil system, a new, innovative and cost effective solution to help reduce waste and environmental impact on construction sites. The system swaps a traditional, single use cartridge for a re-usable cartridge which can be refilled up to 60 times with our 300ml fire rated sealant foils. Join our Duncan Alabaster, our Technical Manager to discover more about our Eco-Foil range and the compatible fire rated sealants.

Making Buildings Safer

The webinar will focus on the legislative and systemic changes required in fire safety, and wider building sector, to ensure buildings are made safer for occupants. It will have a particular focus on the incoming legislation, including the Building Safety Bill, Fire Safety Bill, and proposed changes to the Fire Safety Order (2005). Are the proposals enough? And crucially, how does the sector work to encourage a wide adoption of a new safety-conscious culture in construction and building safety – from planning through to occupation.

Session Format: Presentations into panel discussion

Moderator: James Moore, Editor, IFSEC Global

Panellists:

- Ian Moore, CEO, FIA
- Dennis Davis, Executive Officer, Fire Sector Federation
- Niall Rowan, Technical & Regulatory Affairs Officer, ASFP
- Jonathan O'Neill, OBE, Managing Director, FPA
