Invacare® Matrix® Libra®

Positioning and pressure ulcer prevention cushion for very high risk of skin lesions

- Structure:
 - HR foam base
 - pocket of fluid gel (compartmentalized double layer) for maximum protection at the level of the bone reliefs
 - Cushion fitted with an ischial bowl to optimize the support and positioning of the pelvis.
 - Anatomical curve to promote proper alignment of the thighs.
 - Beveled cutout at the front.
 - Standard black waterproof cover for the protection of the support covered by an outer cover
- Cushion available in two versions: either fitted with the Standard cover (bi-stretch / water-repellent), or fitted with breathable Mesh cover.
- Possibility of adapting positioning accessories

Invacare® Flo-tech Solution Xtra

Positioning cushion and pressure ulcer prevention for high risk.

The **Flo-tech Solution Xtra** cushion is made up of a 70 kg/m³ HR foam base covered with a viscofluid gel layer which allows an even distribution of pressure points.

Compartmentalized gel sheet to ensure the stability of the pool. Standard black cover (bi-stretch, water-repellent and adjustable in height) covering a green Platilon cover in PU (100% waterproof to avoid contamination of the support).

Possibility of adapting positioning wedges under the foam base or between the base and the gel sheet.

The cushion has 2 cutouts:

- At the back to allow the backrest tubes to pass and maximize seat depth
- Below to match the shape of the seat cover and avoid the hammock effect.

Invacare® Flo-tech Plus

Positioning cushion and pressure ulcer prevention for high risk.

The **Flo-tech Plus** cushion incorporates a fluid sac integrated in the cushion seat well. It offers improved stability and postural support. It can be covered with 3 different covers:

- Standard wipedown cover (bi-stretch)
- Black smooth cover
- Black wipedown cover

The cushion delivers a greater degree of pressure distribution. The castellations of the cushion allow slight movements which in turn reduce shear and friction forces.

Invacare® Flo-tech Image

Class 1B pressure ulcer prevention support cushion for low to medium pressure ulcer risk.

The **Flo-tech Image cushion** is composed of an ischial pocket of viscofluid gel on an HR foam base covered with a Standard Black cover (bi-stretch) covering a PU cover (100% waterproof to avoid contamination of the support). The viscofluid gel increases the contact area in the sacral area and limits the risk of friction and shearing.

The cushion has 2 cutouts:

- At the back to allow the backrest tubes to pass and maximize seat depth
- Below to match the shape of the seat cover and avoid the hammock effect.

Invacare® Flo-tech Lite

Class 2 pressure sore prevention cushion for medium to high risk of pressure sores.

The Flo-tech Lite cushion is made from 100% high-resilience foam and covered with a black PU cover (bi-stretchable and water-repellent) and a Platilon cover, which is 100% waterproof to prevent contamination of the support.

The cushion has 2 cut-outs:

- At the back to allow the backrest tubes to pass through and maximise seat depth
- Underneath to match the shape of the seat cover and avoid the hammock effect

Height: 7.8 cm

Invacare® **Matrx® Contour Visco^{NG}**

Class 2 pressure ulcer prevention aid cushion for medium to high pressure ulcer risk.

The **Matrx Contour ViscoNG** cushion is made of 100% viscoelastic memory foam and covered with a black PU cover (bi-stretch and water-repellent). A second identical black cover is also delivered with the cushion. The viscoelastic foam favors the immersion of the parts of the body in contact with the cushion to reduce the pressures due to the increase in the contact areas.

The cushion is beveled at the front to avoid any friction with the popliteal fossa and to allow foot traction.
